## Chapter One

# Introduction

### 1.1 Overview (Idea)

A website that collects everything a person in Jordan is looking for to donate in various forms.

### 1.2 Main Objectives

- Opportunities to donate blood to people in need and cover the need for blood.
- The possibility of contributing to meeting the orphan's basic needs such as food.
- Providing the opportunity to contribute to the restoration and improvement of mosques.
- The Food Parcels Donation Program aims to provide individuals and families in need with a reliable and consistent source of nutritious food.
- Payment and donation processes are easy on the website that we will develop, and it will be through electronic payment platforms available in Jordan, such as efawateercom and CliQ.

### 1.3 Main Motivations

- To meet the need for facilitating various forms of donation, providing quick access through technological support, and enhancing reliability in cooperation with various government agencies.
- And believing that we can make a positive impact in society and make a real difference in people's lives.

## 1.4 Constraints

- The donation entities in this website are attached to official authorities
- To provide a place where all kinds of non-cash donations can be given and directed to its appropriate entity.

## 1.5 Similar Projects

- [ehsan.sa](http://ehsan.sa): إحسان
- [shefa.sa/condition/17799/detail](http://shefa.sa/condition/17799/detail): شفاء

## 1.6 Project Organization

- Minister of Health-Blood Bank manager
- Ministry of Social Development
- Ministry of Endowments (Al-Awqaf)

## Chapter Two

# Project Management

## 2.1 Feasibility study

### 2.1.1 Technical Feasibility

- **Website Development:** Developing a website to facilitate donations would require expertise in web development technologies such as HTML, CSS and JavaScript. Therefore, we need a front-end developer. A cloud-based web server is needed to host the website. The website should have a user-friendly interface that allows individuals to search for donation items, browse donation categories, and submit their donations. However, we will provide a training program to ensure that users are familiar with the website's functionalities.
- **Database Management:** The database should efficiently handle the storage and retrieval of donation details, donor information, and item categorization. So, we need a database administrator.
- **User registration and authentication** are crucial features for the website. Users should be able to register and create accounts to manage their donations. To ensure security, the website needs to implement robust authentication mechanisms, to safeguard user data.
- **Security and Privacy:** Implementing security measures, including data encryption, secure connections (HTTPS), and regular backups, Compliance with data protection regulations, such as GDPR or local privacy laws.
- **Scalability and Performance:** Employing scalable infrastructure and optimizing website performance.

### 2.1.2 Operational Feasibility

Some of the main problems that we aim to avoid them:

-lack of trust is a problem related to donations, as some people may be hesitant to donate due to concerns over whether their donation will be used for its intended purpose.

- Limited resources: While some individuals or organizations may be willing to donate, they may not have the financial resources to do.

-Inefficiency: In some cases, the process of donating can be inefficient, with a large portion of funds going towards administrative costs rather than the intended cause

### 2.1.3 Legal Feasibility

proposed project confirms the legal and ethical requirement, and the proposed system is completely fine with the legal and ethical terms. However, there's some point that needs to be clarified:

- The development team Own the rights of The Source Code, in addition to that any new feature will be considered as a new version that has its cost.

## 2.2 The Needed Hardware and Software

Table 2.1 presents the needed Hardware and Software to develop the project and their estimated cost

*Table 1: Needed Hardware and Software*

	Description	Quantity	Unit Price (JD)	Total Price	Note
<b>HD1</b>	Laptops	4	650 JD	2600 JD	
<b>HD2</b>	Printers	2	115 JD	230 JD	
<b>SW1</b>	cloud-based web server	1	102 JD per year	Infant	
<b>SW2</b>	PHP myAdmin	-	Free		
<b>SW5</b>	Figma	1	Free		

<b>SW6</b>	VS code	4	Free		
<b>Total</b>	<b>Fixed cost: 2830 JD + 102 per year</b>				

## 2.3 The Schedule and The Estimated Time:

### 2.3.1 Schedule

The Project Schedule is presented in Table 1

*Table 2: Project schedule*

<b>Task ID</b>	<b>Description</b>	<b>Duration Time (WD)</b>	<b>Dependency</b>	<b>Responsible Partner/s, Staff</b>	<b>Resources</b>
T1	Data gathering for Gather information and concepts about the project.	4 Days (13/7/2023 to 16/7/2023)	None		1) good writing skills. 2) zoom platform
T2	Prepare a project management plan for A descriptive structure to the project that must be done within a certain timeframe by showing the software process model and how the project will be executed and monitored	13 Days (17/7/2023 to 31/7/2023)	T1		good communication skills between team members

T3	study the feasibility of the project for A study that analyzes the project to figure out if it is feasible and applicable to the aspects of the project. The study will also show if the investment in the project will be successful or not	3 Days (1/8/2023 to 3/8/2023)	T1&T2 (M1)		1)spreadsheets like: Microsoft excel. 2)Being able to deal with financial issues
T4	Writing Functional and non-functional req for A roadmap and a description for the software that helps to fully understand it	3 Days (4/8/2023 to 6/8/2023)	T1& T3		Business analyst
T5	write use case diagrams and description for each for must do a diagram that represents the interactions between actors and use cases in a system.	3 Days (7/8/2023 to 9/8/2023)	T3,T4		lucid.app
T6	prepare UML diagrams for a Unified Modeling Language that represents different aspects of a system.	3 Days (10/8/2023 to 12/8/2023)	T5 (M2)		lucid.app app.creately

T7	design the physical database for the logical design of a database	3 Days (13/8/2023 to 15/8/2023)	T5,T6		Microsoft Access
T8	design architecture of the system for a clear and flexible structure for the system	4 Days (16/8/2023 to 19/8/2023)	T5,T6		photoshop
T9	design graphical user interface for A good GUI should be user-friendly and should provide clear and easy access to the functionality of the system	4 Days (20/8/2023 to 23/8/2023)	T6,T8		Figma (cloud-based design tool)
T10	implement the graphical user interface for writing code, then adding functionality	3 Days (24/8/2023 to 26/8/2023)	T7,T9		1)HTML, CSS, JavaScript programmer 2)Visual studio
T11	Test the system for to ensure the system meets requirements and functions correctly.	3 Days (27/8/2023 to 29/8/2023)	T9,T10 (M3)		-
T12	prepare the user manual for A guide that helps users to know how to use the website	2 Days (30/8/2023 to 31/8/2023)	T5,T9,T10,T11		Figma

### 2.3.2 Pert Diagram

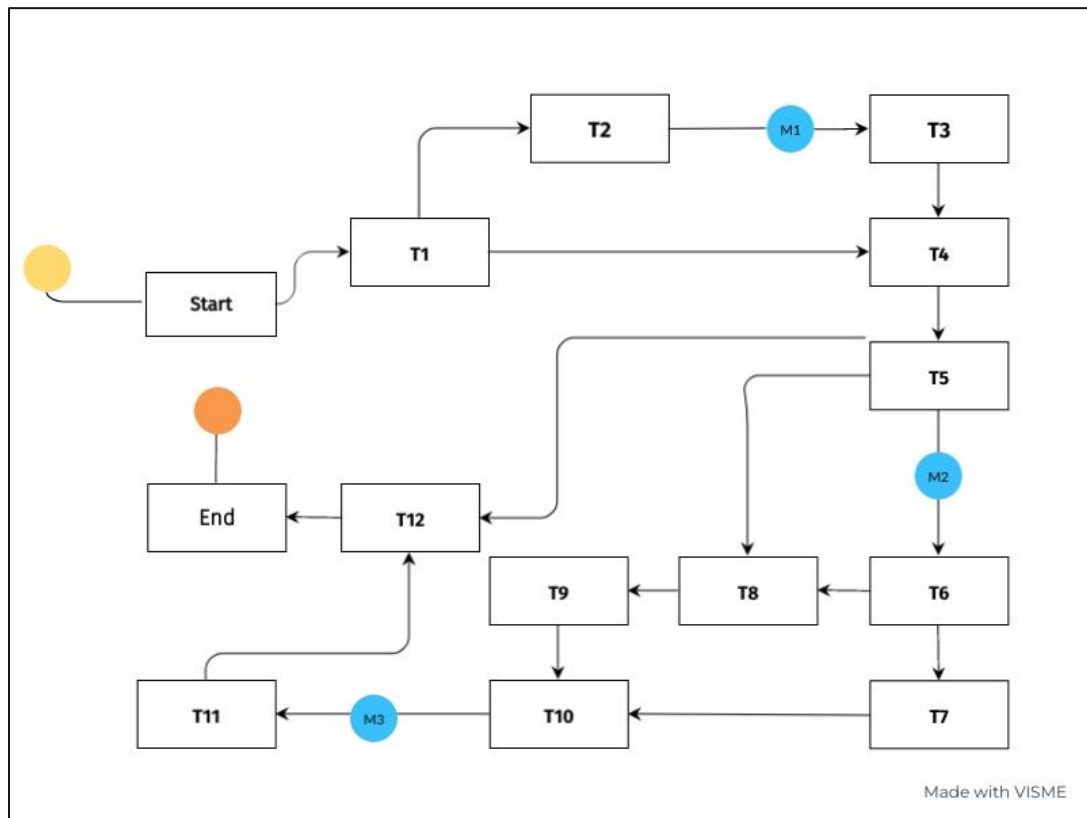

Figure 1: Pert Diagram

Estimated Time (WD) = 48 days (WDs)

## Chapter Three

# Project Specifications

### 3.1 Stakeholder

*Table 3: Stakeholders*

ST ID	Stakeholder	Note
ST1	Users: Individuals who are potential blood donors, clothing contributors, donors to the orphan's needs, contributors to mosque restoration, and supporters of environmental initiatives	
ST2	Ministry of Social Development: Involved in coordinating and supporting initiatives related to meeting the needs of orphans, and collect data on poor families for food parcel	
ST3	Civil service consumer corporation :Collaborate with Civil service consumer corporation for sourcing the food items	
ST4	Ministry of Endowments (Alwqaf) : Involved in mosque restoration and improvement initiatives.	

ST5	Minister of Health-Blood Bank manager :Responsible for overseeing and coordinating blood donation initiatives and managing the Blood Bank.	
ST6	Ministry of Endowments (Alwqaf) : Involved in mosque restoration and improvement initiatives.	
ST7	Minister of Health-Blood Bank manager: Responsible for overseeing and coordinating blood donation initiatives and managing the Blood Bank.	

## 3.2 Data Gathering Techniques:

### 3.2.1 Interview:

Interview: we gathered information and requirements from project lead to understand their needs and expectations for a software project. It involves asking questions and discussing various aspects of the project to ensure a clear understanding of the scope, requirements, and desired outcomes. The information collected during interviews serves as the foundation for designing and developing an effective.

#### o The Interview:

Lara: Can you provide an overview of the registration process and the information you collect from users?

Mr. Firas: Certainly. During the registration process, users are required to fill out a form with their personal information. This includes their full name, phone number, age, and residential address. Additionally, there are two checkboxes that allow users to select their notification preferences. If a user expresses interest in blood donation, further options are displayed, such as blood type, weight, health status, and gender. If a user selects orphan sponsorship, they will receive notifications when an orphan without a sponsor requires sponsorship.

Lara: That sounds like a comprehensive registration process. Now, let's discuss the login functionality. How do users access their accounts?

Mr. Firas: To log in, users enter their phone number. Once entered, a verification code is sent to their phone to ensure secure access to their account.

Lara: Great. Now, let's talk about the language selection feature. How does your system allow users to choose their preferred language?

Lara: Our system includes a language selection feature in the user profile settings. Users can choose between Arabic and English as their preferred language, and the system will adapt accordingly to display the content in their chosen language.

Lara: Excellent. Let's move on to the blood donation aspect of your project. How does your system facilitate blood donation scheduling and communication with donors?

Mr. Firas: Our system allows users to schedule blood donation appointments conveniently. It provides a user-friendly interface where donors can select suitable dates and times for their appointments. Additionally, we have a notification system

in place to remind donors about upcoming blood donation drives or urgent blood needs, ensuring effective communication and participation.

Lara: That's impressive. Now, could you tell us more about the donor tracking aspect? How does your system maintain records and history for tracking and follow-up purposes?

Mr. Firas: Our system maintains a comprehensive record of donors and their donation history. This includes details such as the dates and types of donations made by each donor. By tracking this information, we can ensure a consistent supply of blood and provide follow-up support or gratitude to donors as needed.

Lara: Moving on to orphan support, how does your system facilitate monetary donations and ensure transparency?

Mr. Firas: Our system provides a dedicated section for collecting monetary donations to support orphans' basic needs. Users can contribute by paying a monthly sponsorship amount of 25 JD. To ensure transparency and accountability, we provide regular reports on the utilization of funds, demonstrating how the donations are making a difference in the lives of the sponsored orphans.

Lara: That's commendable. How does your system indicate the sponsorship status of an orphan and handle sponsorship renewal?

Mr. Firas: The system clearly indicates whether an orphan is currently sponsored or not. This information is displayed alongside the orphan's profile or in a designated section. Additionally, the system tracks the duration of each sponsorship period, showing the start date and the number of months it has been ongoing. If the sponsorship period expires, the system sends a notification or reminder to the user, encouraging them to renew their sponsorship if they wish to continue their support.

Lara: Let's move on to the Food Parcels program. How does your system handle partnerships, parcel composition, and donation options?

Mr. Firas: Our system collaborates with the Civil Service Consumer Corporation for sourcing the food items needed for the parcels, optimizing costs, and maximizing distribution. We also partner with the Ministry of Social Development to collect data on poor families. The system offers three flexible donation options: food parcels for 1-2 persons priced at 18 JD, for 3-5 persons priced at 35 JD, and for 6-7 persons priced at 50 JD. Users can select the desired number of food parcels they wish to donate.

Lara: That's impactful. Could you elaborate on the volunteer aspect? How do users indicate their interest and choose the most convenient time for them?

Mr. Firas: Users who wish to volunteer can indicate their interest on the website. They can choose between preparing food parcels or providing delivery services to families' houses. Once they select their preferred option, the system displays available slots and appointments. Users can then choose the most convenient time for their volunteering activities.

Lara: Let's talk about the restoration and improvement of mosques. How does your system support these projects and facilitate financial donations?

Mr. Firas: We collaborate with the Ministry of Endowments (Al-Awqaf) to support restoration and improvement projects in need of funding. Our system provides a platform where users can make financial donations specifically for mosque restoration and improvement. This ensures that individuals can contribute directly to these projects and help preserve and enhance these important community spaces.

Lara: Lastly, let's discuss electronic payment integration. How does your system incorporate electronic payment platforms for seamless transactions?

Mr. Firas: We have integrated electronic payment platforms such as efawateercom and Click to Donate into our website. This allows users to make secure and convenient online transactions when donating or making payments for various aspects of our project. By leveraging these platforms, we aim to provide users with a smooth and hassle-free payment experience.

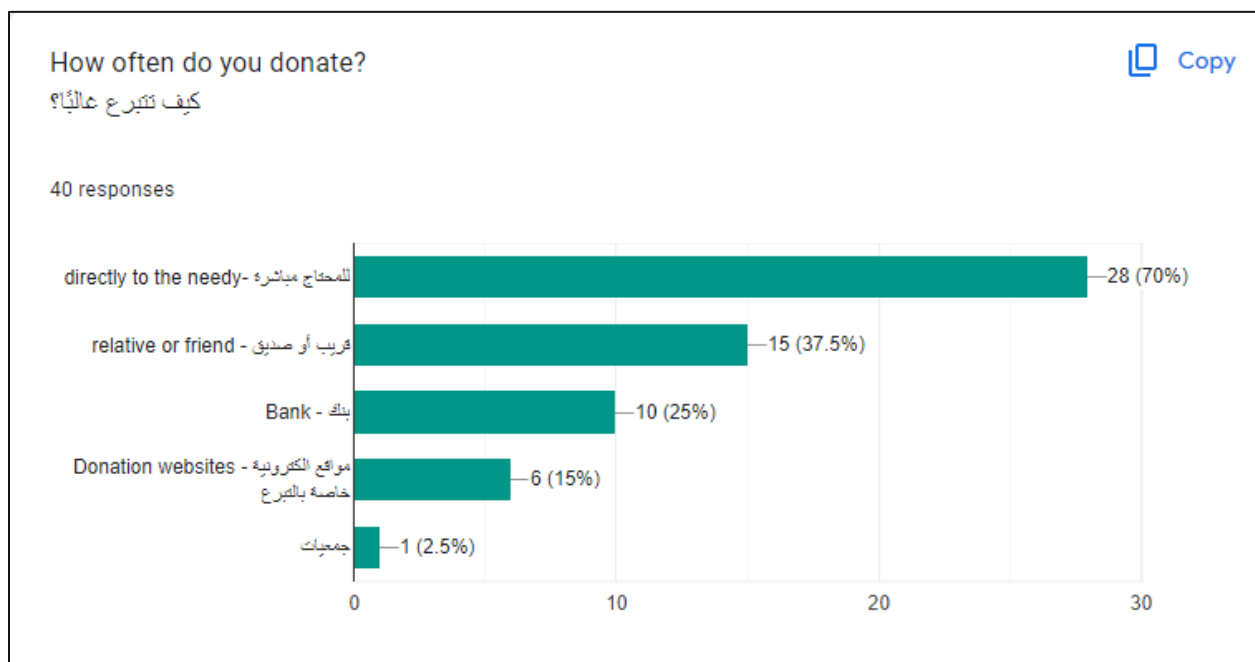

Lara: Thank you, Mr. Firas, for providing insights into your project's functionalities. It's evident that your system is designed to address multiple aspects of support and convenience for users. We appreciate your time and wish you continued success with your initiative.

Mr. Firas: Thank you for having me. It's been a pleasure discussing our project with you. We hope that our efforts can make a positive impact on the lives of those in need.

### 3.2.2 Survey:

**Questionnaire:** is a research instrument that consists of a set of questions or other types of prompts that aims to collect information from a respondent.

Figure 2: Questionnaire

Have you ever donated through reliable means of donation in the Kingdom such as (Tkiyet Um Ali and the Central Blood Bank...)

 Copy

هل سبق وتبرعت عن طريق وسائل التبرع الموثوقة في المملكة مثل (تكية أم علي وبنك الدم المركزي ..)

40 responses

In your opinion, why don't people use the official websites to donate?

 Copy

برأيك، لماذا لا يستخدم الناس المواقع الالكترونية الرسمية للتبرع؟

If there is a site that collects the official donation sites, what humanitarian services would you prefer to provide?

 Copy

إذا كان هناك موقع يجمع المواقع الرسمية للتبرع، ما الخدمات الإنسانية التي تفضل تقديمها؟

40 responses

If there is an official site that has all the official donation entities, will it encourage you to donate?

 Copy

إذا كان هناك موقع يجمع المواقع الرسمية للتبرع، هل سيشجعك ذلك على التبرع؟

40 responses

### 3.3 Functional Requirements

The functional requirements are shown in Table 3.3

Table 4: Functional Requirements

FR-ID	Description	ST	Priority	Note
FR1	The user can click sing-up the button	ST1	5	
FR2	The system displays a registration form with fields for Name, Phone Number, Age, and Address.	ST1 ST7	5	
FR3	The user enters the required information.	ST1	5	
FR4	The user selects one or both checkboxes for Notification Purposes (Blood Donation and Orphan Sponsorship).	ST1 ST2 ST5	4	

FR5	If the user selects the Blood Donation checkbox, the system displays additional fields for Blood Type, Weight, Health Status, and Gender.	ST1 ST5	4	
FR6	The user submits the registration form.	ST1 ST7	4	
FR7	The system validates the entered information, ensuring a unique phone number If the information is valid, the system creates a new user account and sends a verification code.	ST1 ST7	4	
FR8	The user receives the verification code and follows the instructions to verify the account.	ST1 ST7	4	
FR9	The user visits the login page.	ST1	4	
FR10	The system provides a field for the user to enter their phone number.	ST1 ST7	4	
FR11	The user enters their phone number.	ST1	4	
FR12	The system sends a verification code to the user's phone number.	ST7	4	
FR13	The user enters the verification code.	ST1	4	

FR14	The system verifies the code and logs the user into the home page.	ST7	4	
FR15	user navigates to the right most of the page, The system presents a language selection option.	ST1 ST7	1	
FR16	The user chooses their preferred language (Arabic or English) And The system displays the user interface and content in the selected language.	ST1 ST7	1	
FR17	The user can go back to the home page by clicking the back button.	ST1	1	
FR18	The user clicks the blood donation program in the home page	ST1	4	
FR19	The system displays available time slots and donation centers.	ST5 ST7	3	
FR20	The user selects a suitable time slot and donation center.	ST1	3	
FR21	The system confirms the appointment and sends a confirmation notification to the user.	ST7	3	
FR22	The system sends reminders to the user about the upcoming appointment.	ST7	3	

FR23	If there is an urgent blood need or a recipient requiring blood matching the user's blood type, the system sends a notification to the user.	ST5 ST7	3	
FR24	The user can track their blood donation history through the system.	ST1 ST7	3	
FR25	The user clicks the orphan program in the home page	ST1	4	
FR26	The system provides options for making monetary donations to support orphans' basic needs.	ST1 ST2	3	
FR27	The user selects the option to pay a monthly amount of 25 JD for orphan sponsorship.	ST1 ST2	3	
FR28	Users can select their preferred electronic payment method during the donation process.	ST1 ST6	3	
FR29	The system records the donation and updates the user's sponsorship status.	ST2 ST7	3	
FR30	The system generates regular reports on fund utilization and provides transparency to donors.	ST7	3	

FR31	If the user's sponsorship period expires, the system sends a notification or reminder to renew the sponsorship.	ST7	3	
FR32	The user clicks the Food parcel program in the home page	ST1	4	
FR33	The system offers a section that enables users to donate to the food parcels program.	ST7	3	
FR34	Users are presented with three flexible donation options a. Food parcel for 1-2 persons priced at 18 JD.  b. Food parcel for 3-5 people priced at 35 JD.  c. Food parcel for 6-7 people priced at 50 JD.	ST2  ST3 ST7	3	
FR35	Users can select the desired number of food parcels they wish to donate.	ST1 ST7	3	
FR36	On the same page, the system includes an additional field for users who wish to volunteer.	ST7	2	
FR37	Users can choose from two options:  a. Volunteer to prepare food parcels.  b. Volunteer to provide delivery services to families' houses.	ST1 ST7	2	
FR38	After selecting the desired volunteer option, the system displays available slots and appointments	ST7	2	

FR39	Users can select the most convenient time slot for their volunteering activity	ST1	2	
FR40	The user clicks the improvement mosque program in the home page	ST1	4	
FR41	The system provides a platform for accepting financial donations for mosque restoration and improvement projects.	ST4 ST7	3	
FR42	Users can donate funds through the system.	ST1 ST6	3	
FR43	User can go back to the home page by clicking a home button	ST1 ST7	3	
FR44	User can log out	ST1 ST7	2	

For priority; 5 means highest and 1 means lowest Priority.

### 3.4 Non-Functional Requirements

The non-functional requirements are shown in Table 3.4

*Table 5: Non-Functional Requirements*

ID	Requirement	Description	Priority
NFR1	Speed	The website should be as fast as possible to achieve the purpose. the website won't take more than 5 seconds to load the pages	4
NFR2	Ease of use	The time frame should include all human and system processes. In addition, it should be easy for the user to learn how to use the website.	5

		It will take the users 30 minutes training to use the website, a 10-minute quiz with a score out of 10 about the icons, buttons will get an average of 8.5	
NFR3	Reliability	extent which it works as and when needed	5
NFR4	Security	All data entered by user or consultant such as login information, phone number, residential address must be secured and well stored in the database.	4

Priority: 1 for lowest priority, 5 for Highest Priority

### 3.5 Domain Requirements

*Table 6: Domain Requirements*

DR-ID	Description
DR1	As the system is a web application, internet connectivity is a must. The system must be connected at all times to the internet. The users must be connected to the internet when connecting and viewing the site as well.
DR2	The users must be able to use a browser on their devices. The browser is the application that allows them to connect to the website.

### 3.6 Requirements Analysis and the Architecture Design

GR1 (Regression): FR1+FR2, FR3, FR4+FR5, FR9, FR10+FR11, FR12+FR13, FR14, FR45

GR2 (Home page): FR15, FR16, FR17, FR18, FR25, FR32, FR40

GR3 (Blood Donation): FR19, FR20, FR21, FR22, FR23, FR24

GR4 (The orphan program): FR26, FR27, FR28, FR29, FR30, FR31

GR4 (Food parcel): FR33+FR34, FR35, FR36+FR37, FR38, FR39

GR5 (Improvement Mosque program): FR41, FR42

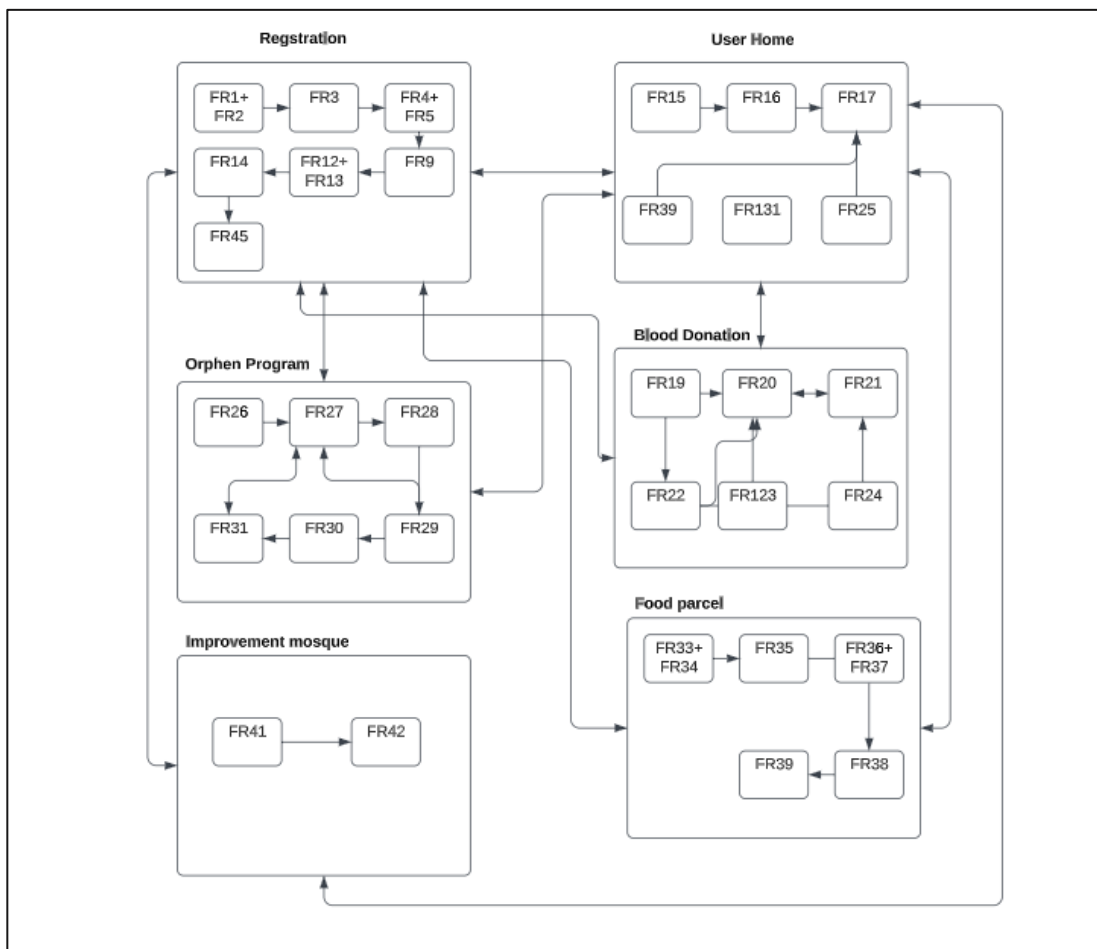

Figure 3: Architecture Design

## Chapter Four

# Project Design

## 4.1 Class Diagram

Figure 4: Class Design

### ❖ Identify Entities:

- User.
- Payment Details.
- Electronic Payment Integration.
- Mosque Donation Platform Class.
- Food Parcels.
- Mosque Restoration Partnership Class.
- Orphan Sponsorship Class.
- Language Selection.

- Orphan Support Reporting.
- Language Selection.
- Orphan Support Donation.
- Donor Tracking.
- Orphan Sponsorship Class.
- Volunteer.
- Blood Donation Class.
- Bloodav-time.

❖ Define Attribute:

- User:
- Name(string).
- Age(int).
- Gender(string).
- Address (string).
- Phone number(int).
- Notification (array of Notification object).
- Language (String).

❖ Payment Details:

- Amount(float).
- Secure Token (string).

❖ Electronic Payment Integration:

- Integrate With Payment Platform (string).
- Process Payment (Payment Details).

❖ Mosque Donation Platform Class:

- Accept Donation (float).

❖ Food Parcels:

- Parcel Composition (array of string).
- Donation Options (array of Donation Options object).

❖ Mosque Restoration Partnership Class:

- Collaborate With Ministry ().

❖ Orphan Sponsorship Class:

- Monthly Amount (float).
- Start Date (date).
- Expiry Date (date).

❖ Language Selection:

- Set Language Preference (string).

❖ Orphan Support Reporting:

- Generate Report ().

❖ Language Selection:

- Set Language Preference (user:User, Language:string).

❖ Orphan Support Donation:

- Donation Amount (float).

❖ Donor Tracking:

- Add Donor (user: User).
- Get Donor History (user: User).

❖ Orphan Sponsorship Class:

- Monthly Amount(float).
- Start Date (date).
- Expiry Date (date).

❖ Volunteer:

- Av-time (date).

❖ Blood Donation Class:

- Blood Type (string).
- Weight (float).
- Health Status (string).
- Gender (string).

❖ Bloodav-time1:

- Schedule Appointment(user:User,date:date)

❖ Specify Constraints:

- Phone Number should be vailed.
- Age should be within reasonable a range.

❖ Define Relationship:

- Blood Donation Class and Blood av-time have a many-to-one relationship.
- All entity with the user has a one-to one relationship.

## 4.2 Use case Diagram

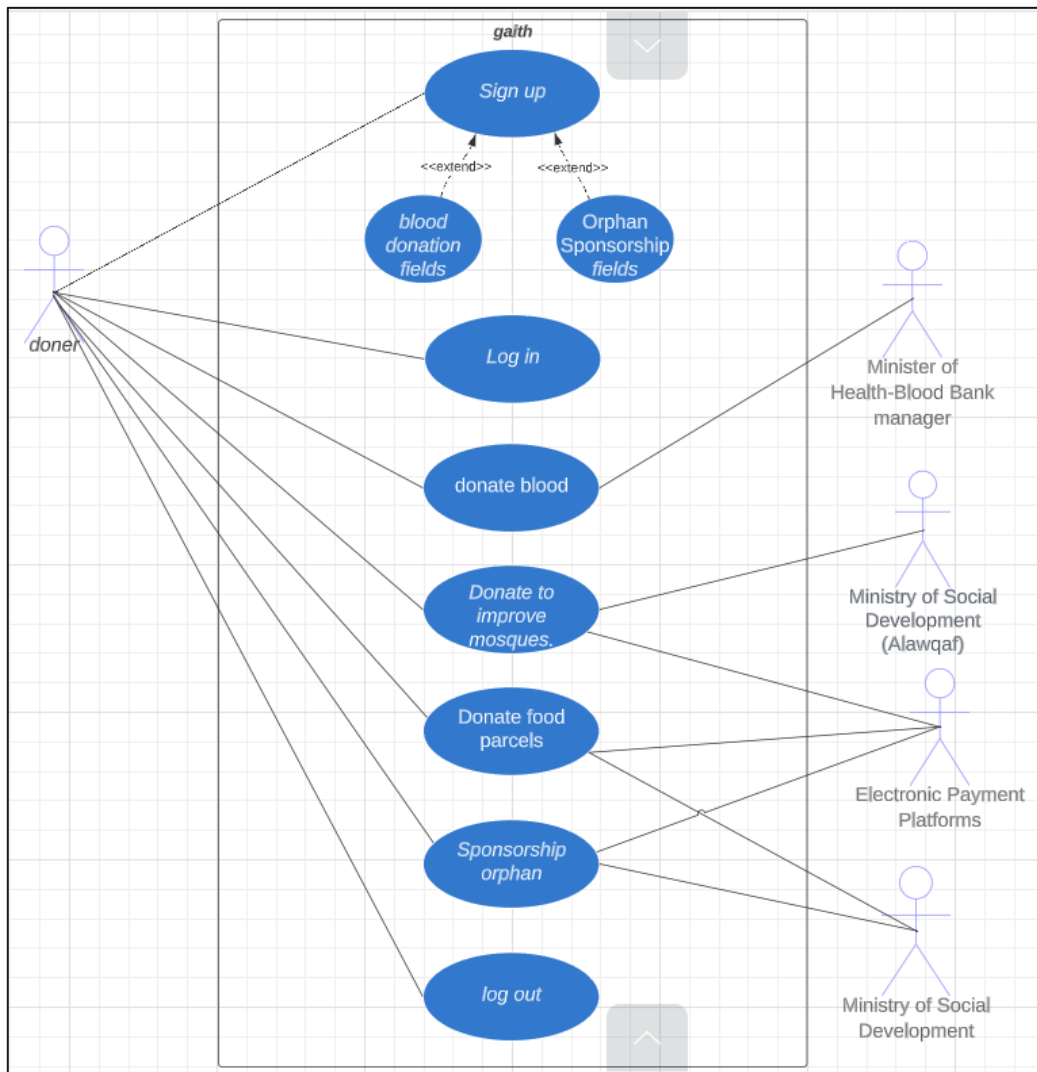

Figure 5: Use case Diagram

#### 4.2.1 USE-CASE Description

Table 7: Use Cases Description:

Sign Up	
<b>Actors</b>	User
<b>Description</b>	The user will enter a Name, valid Phone Number, Age, and valid Address, and is registered in the database.
<b>Data</b>	Name, Phone Number, Age, and Address
<b>Stimulus</b>	User clicks Sign Up button
<b>Response</b>	Sign up is successfully done and user is redirected allowed to login using Phone Number
<b>Comments</b>	If the user enters invalid email, or they enter an already Phone Number, or invalid Address he won't be able to sign up successfully.
Blood Donation Fields	
<b>Actors</b>	User
<b>Description</b>	The user will enter Weight, Health Status, and Gender, then is registered in the database.
<b>Data</b>	Weight, Health Status, and Gender.
<b>Stimulus</b>	User submits the registration form.
<b>Response</b>	If there is an urgent blood need or a recipient requiring blood matching the user's blood type, the system sends a notification to the user.
<b>Comments</b>	_____
Orphan Sponsorship Fields	
<b>Actors</b>	User
<b>Description</b>	checkboxes for Notification Purposes If the donor is interested in contributing to support Orphan.
<b>Data</b>	_____
<b>Stimulus</b>	The user selects checkbox Orphan Sponsorship.
<b>Response</b>	If there is an opportunity, donate to orphans the system sends a notification or reminder to the user.

<b>Comments</b>	_____
<b>Log in</b>	
<b>Actors</b>	User
<b>Description</b>	User enters his Phone Number, and then he clicks on Login. Then he is redirected to the homepage.
<b>Data</b>	Phone Number, verification code.
<b>Stimulus</b>	User clicks the login button.
<b>Response</b>	Login succeeds and the system sends a verification code to the user's phone number, the user should enter the code in the system then will redirected to homepage.
<b>Comments</b>	User is not logged in if his phone number or verification code is wrong.
<b>Donate Blood</b>	
<b>Actor</b>	User and Minister of Health-Blood Bank manager
<b>Description</b>	User selects a suitable time slot and donation center.
<b>Data</b>	List of available dates for donation and donation centers.
<b>Stimulus</b>	User clicks donate button.
<b>Response</b>	The system confirms the appointment and sends a confirmation notification to the user and sends reminders to the user about the upcoming appointment.
<b>Comments</b>	If there is an urgent blood need or a recipient requiring blood matching the user's blood type, the system sends a notification to the user.

Donate to improve mosques.	
<b>Actor</b>	User, Ministry of Social Development (Alawqaf) and Electronic Payment Platforms
<b>Description</b>	After the user sees the mosque restoration and improvement projects on the system, he can donate funds through the system to improve mosques.
<b>Data</b>	mosque restoration and improvement projects
<b>Stimulus</b>	User clicks donate button.
<b>Response</b>	The donation is through electronic payment platforms.
<b>Comments</b>	_____

Donate food parcels	
<b>Actor</b>	User, Electronic Payment Platforms and Ministry of Social Development
<b>Description</b>	Users can select the desired number of food parcels they wish to donate, and the system includes an additional field for users who wish to volunteer.
<b>Data</b>	food parcels options
<b>Stimulus</b>	User clicks selected option (radio button) and users can choose from volunteering options.
<b>Response</b>	The donation is through electronic payment platforms.
<b>Comments</b>	The volunteering is an optional

Sponsorship orphan	
<b>Actor</b>	User, Electronic Payment Platforms and Ministry of Social Development.
<b>Description</b>	The user selects from provided options for donations to support orphans by donate a monthly amount of 25 JD.
<b>Data</b>	Orphans' data.
<b>Stimulus</b>	The user chooses the selected orphan.
<b>Response</b>	The system records the donation and updates the user's sponsorship status.

Logout	
<b>Actor</b>	User.
<b>Description</b>	User clicks on the logout button. His session is then destroyed.
<b>Data</b>	No data.
<b>Stimulus</b>	User clicks Logout button.
<b>Response</b>	User session is destroyed.
<b>Comments</b>	Session is not destroyed if the system's servers are down.
<b>Comments</b>	If the user's sponsorship period expires, the system sends a notification or reminder to renew the sponsorship.

## Chapter Five

# 5.1 Project Implementation

### 5.1.1 The Programming Language.

We use Html, CSS, JavaScript, PHP

Segment of the most important part of implementation

Figure 15: Registration

## Chapter Six

# 6.1 Project Testing

### 6.1.1 Test cases

Table 8: Test Cases

Test scenario	Test cases	Test data	Expected results	Actual results	Pass/ Fail
1- Check user sign up	enter Name, Phone Number, Age, and Address	valid Phone Number	Login must be successful	home page appears	Pass
2- Check user login	enter Phone Number	valid Phone Number	Login must be successful	user home page appears	Pass
3- Check login functionality	Check response on entering invalid Phone Number	invalid Phone Number	“Required” should be displayed	Login not successful	Pass
4- Check sign up functionality	Check response on entering invalid Phone Number	invalid Phone Number	“Required” should be displayed	Sign up not successful	Pass

## 6.1.2 Test methodologies

Table 9: Heuristic evaluation

Numbering scheme	Heuristic	Description
H1	<b>Visibility of system status.</b>	The system should always keep user's informed about what is going on, through appropriate feedback within reasonable time.
H2	<b>Match between system and the real world.</b>	The system should show information in the user's language, with words, phrases and concepts familiar to the user, rather than system-oriented terms. Follow real-world conventions, making information appear in a natural and logical order.
H3	<b>User control and freedom</b>	User's often choose system functions by mistake and will need a clearly marked "emergency exits" to leave the unwanted state. Support message dialog and help instruction.
H4	<b>Consistency and standards</b>	User's should not have to wonder whether different data, situations, or actions mean the same thing.
H5	<b>Help users recognize, diagnose and recover from errors.</b>	Error messages should be expressed in plain language (no code), precisely indicating the problem, and constructively suggesting a solution.
H6	<b>Error prevention.</b>	Even better than a good error message is a careful design that prevents a problem from occurring in the first place.
H7	<b>Recognition rather than recall.</b>	Make objects, actions, and options visible. The user should not have to remember information from one part of the dialogue to another. Instructions for use of the system should be visible or easily retrievable whenever appropriate
H8	<b>Flexibility and efficiency of use.</b>	Accelerators - unseen by the novice user – may often speed up the interaction for the expert user such that the system can cater to both inexperienced users. Allow user to tailor frequent actions.
H9	<b>Aesthetic and minimalist design.</b>	Dialogues should not contain information that is irrelevant or rarely needed. Every extra unit of information in a dialogue competes with a relevant unit of information and diminishes their relative visibility.
H10	<b>Help and documentation</b>	Even though it is better if the system can be used without documentation, it may be necessary to provide help and documentation. Any such information should be easy to search, focused on the user's task, list concrete steps to be carried out, and not to be too large.

Table 10: Summary of Violations by Heuristics

Numbering Scheme	Frequency	Ratio (%)
H1	5	10.00
H2	5	10.00
H3	3	06.00
H4	3	06.00
H5	10	20.00
H6	2	04.00
H7	5	10.00
H8	6	12.00
H9	4	08.00
H10	7	14.00
Total	<b>50</b>	<b>100%</b>

system was tested by three IT experts and there are the results:

Table 11: Severity rating and their Description

Severity Rating	Description
0	I don't agree that this is a usability problem at all
1	Cosmetic problem only: need not to be fixed unless extra times are available on project.
2	Minor usability problems: Fixing this should be given low priority.
3	Major usability problem: import to fix, so should be given high priority.
4	Usability Catastrophe: Import to fix this before product can be released.

Table 12: Summary of Violations by Severity Rating for Participant (1)

SEVERITY RATING	FREQUENCY	RATIO (%)
0	6	0.60
1	2	0.20
2	1	0.10
3	1	0.10
4	0	0.00
TOTAL	10	100%

Table 13: Summary of Violations by Severity Rating for Participant (2)

SEVERITY RATING	FREQUENCY	RATIO (%)
0	5	0.50
1	1	0.10
2	2	0.20
3	1	0.10
4	1	0.10
TOTAL	10	100%

Table 14: Summary of Violations by Severity Rating for Participant (3)

SEVERITY RATING	FREQUENCY	RATIO (%)
0	3	0.30
1	0	0.00
2	3	0.30
3	1	0.10
4	3	0.30

Survey:

*Questionnaire:* we put out a google form to a group of people

Interview:

*Interview:* we gathered information and requirements from project lead to understand their needs and expectations for a software project. It involves asking questions and discussing various aspects of the project to ensure a clear understanding of the scope, requirements, and desired outcomes. The information collected during interviews serves as the foundation for designing and developing an effective.
